3. [citrix receiver installation error the requested operation has failed](#)

The “Uninstall Citrix Receiver” application uninstalls (removes) Citrix Receiver.. All versions of Receiver for Windows after version 4.4 can upgrade from any older version of Receiver without the need of using the clean up utility.. Choose to download and install the Citrix Receiver After the installation is complete, when prompted to Add Account or Finish, just click Finish Once installed, proceed to our Logon Site at to log in and click on the applications you wish to use.. Have you checked on the device to see if the installation actually succeeded? I've had a couple of instances where the installer says that it failed, even though it worked (Citrix Receiver).

citrix receiver installation failed
